INSTRUCTION MANUAL
APN AND BASIC NETWORK CONFIGURATION
Apple iPhone 12

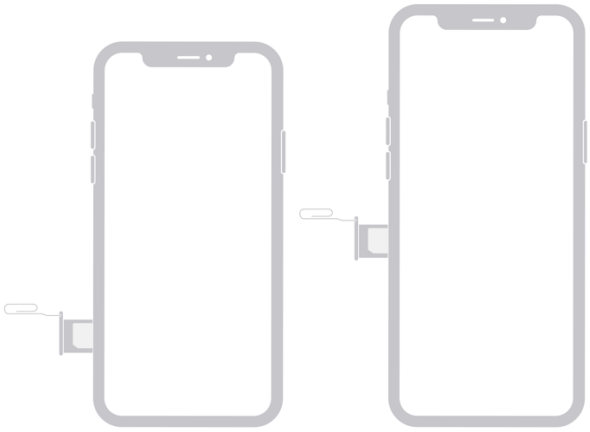
STEP 1:

Insert Geoverse SIM Card:

This follows the same process as inserting any other SIM card. Insert the card and skip to step 2 or follow the instructions below to learn how.

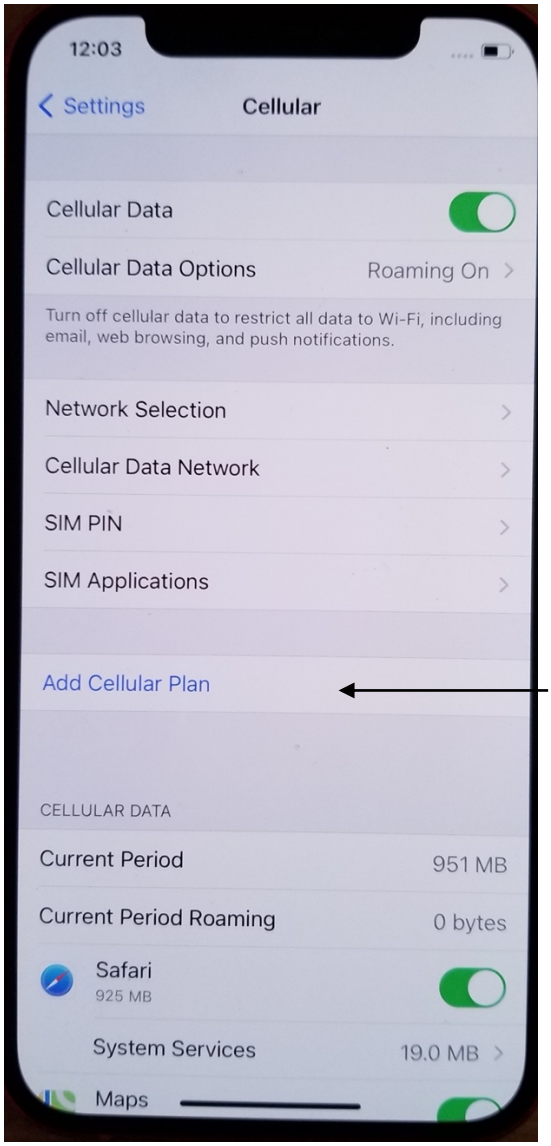
Remove the SIM

Insert the SIM removal pin that came with your phone into the hole in the small tray on the left side of your phone. You may have to apply some pressure to open it. Place the SIM Card into the tray and close it. Push in, towards the iPhone, but don't force it.
If the phone is off, turn it on, otherwise, reset it.

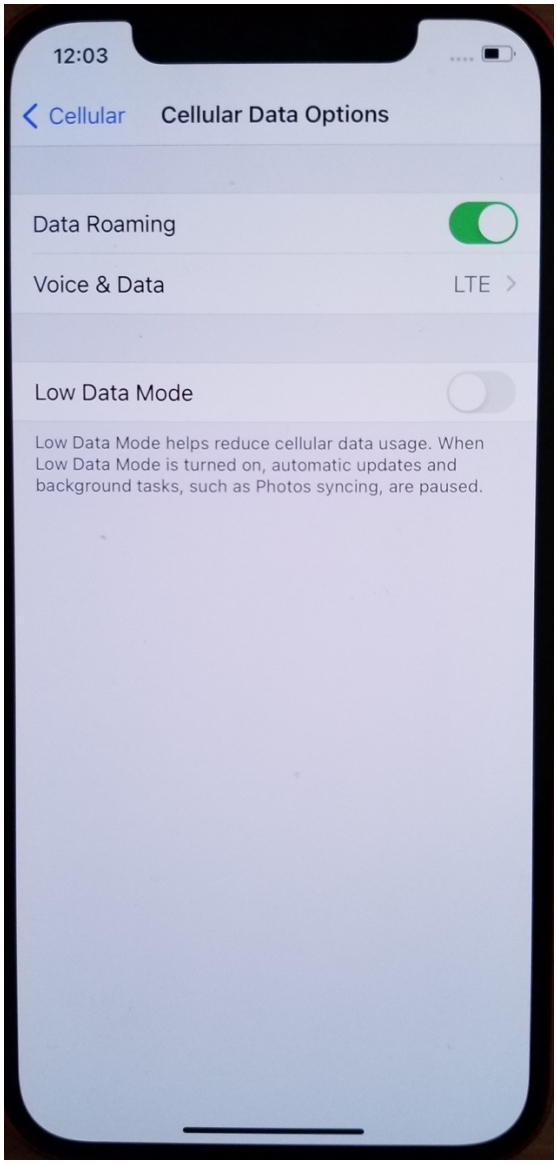


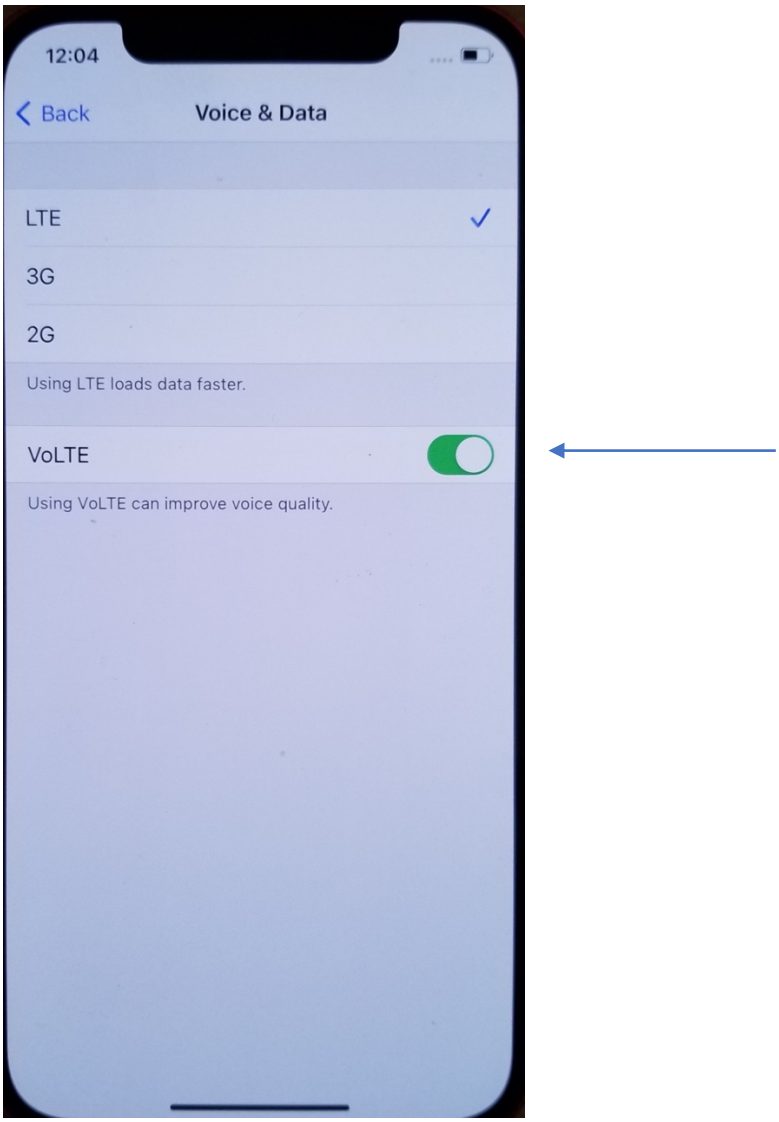
To set up the APN of iPhone 12:

1. Navigate to your iPhone's Settings menu, then to the Cellular menu
2. Select the SIM you want to choose from the cellular plans or add a cellular plan.



3. Navigate to cellular data options and confirm that the Voice and Data setting has VoLTE turned on. (This step is still critical regardless of if your phone has a phone number). If VoLTE is off, turn it on.





4. Then go to Cellular Data Network, then APN
5. Type geoverse.[your APN] in both the APN fields.
